To Whom It May Concern:

I have recently had the pleasure of having Bill Pelcier join our design team on a project for one of our long standing clients. While we have only been working together for a short time, Bill has quickly impressed us with his knowledge and leadership concerning the implementation of the special inspections process within our project documents and city submissions. He has been the sole expert on our team when dealing with these issues and has shouldered the responsibility with confidence and enthusiasm. Bill has gone out of his way to discuss and inform all members of the team of the nuances within the special inspections process, and is now working closely with our general contractor to ensure the project continues to proceed smoothly. I can say with confidence that without Bill's involvement, our project would have suffered costly delays due to our team's lack of experience with these municipal requirements.

Bill has been a pleasure to work with on our project, and we are planning to integrate him as part of our design team for future projects. He has been a consummate professional throughout design and construction process. Responsive, knowledgeable, and easy to work with, Bill has continually ingratiated himself with us and our client. I highly recommend Bill Pelcier for structural engineering and special inspection services.

Sincerely,

SHANE BOSTICK
